John Snow LABS

Visual NLP

Alberto Andreotti

October 2026

Agenda

- Introduction to Visual NLP. Basic Concepts. Examples.
- Data Extraction Pipelines. Mixed Formats. Forms. Tables.
- De-identification & Obfuscation. PDFs and Dicoms.
- 5‘ Break
- VLMs. Different sizes and deployment options.
- Handwritten Text.
- Q&A.

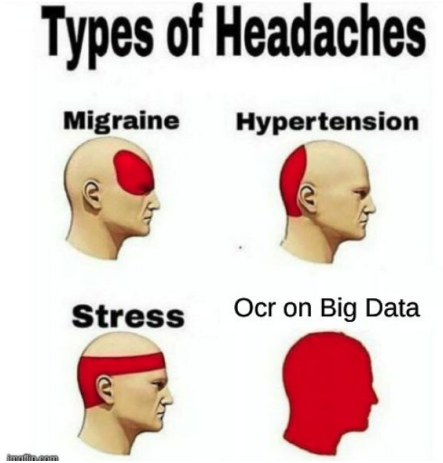

Presenters today

Alberto

Introduction to Visual NLP

- Lots of text data locked into document images.
- We identified the strong need for a scalable solution.
- Three sources of stress: big data, big computation, big models.
- The job is not suitable for a single machine: need to scale out.
- Programming in the cluster is challenging.

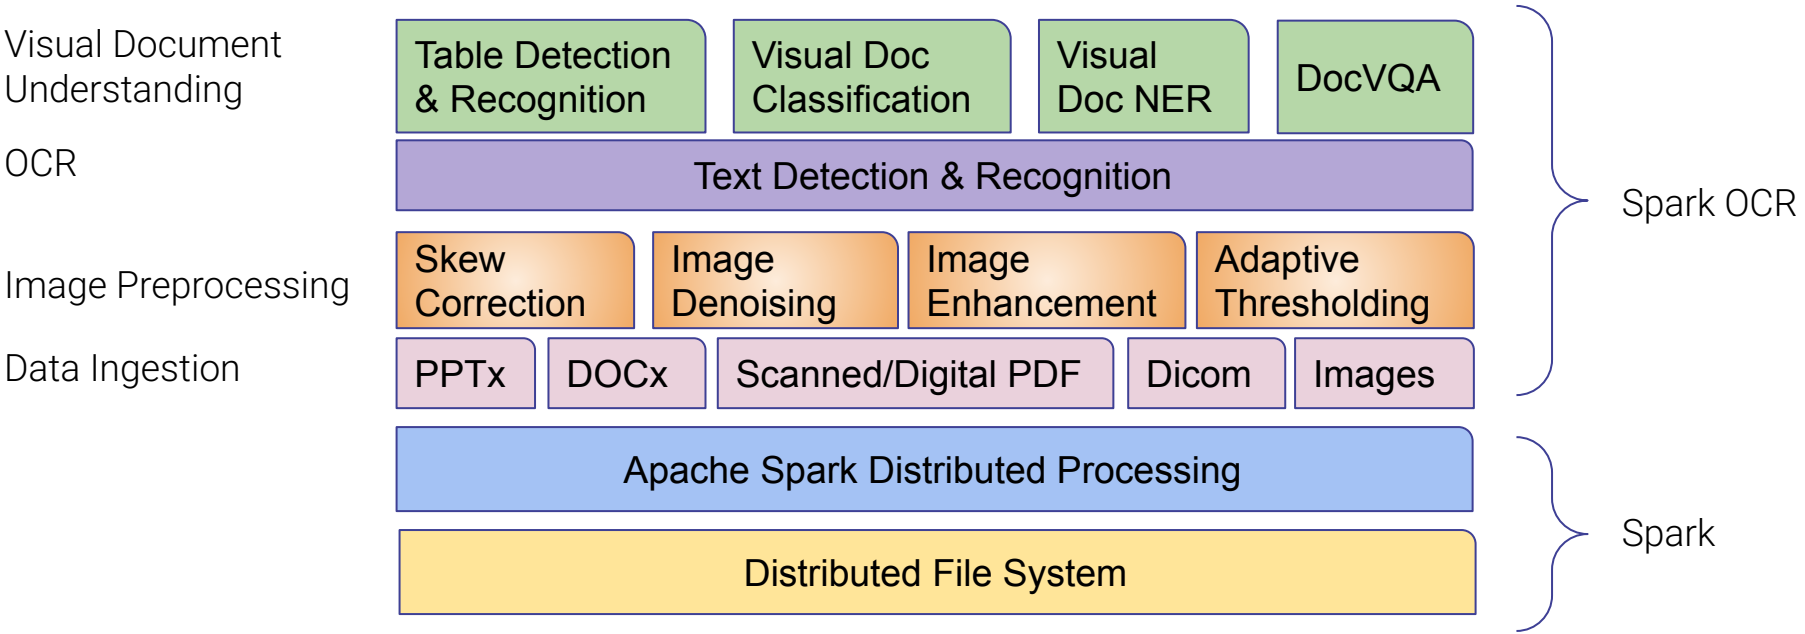

Motivation

STARBUCKS STORE #10208

SBUX CARD X3228 NEW BALANCE: 37.45
CARD IS REGISTERED

- 111835b(JPEG) vs. 315b, a **355** factor!!.
- Density of information is much lower in OCR than NLP.
- Handling images is challenging.

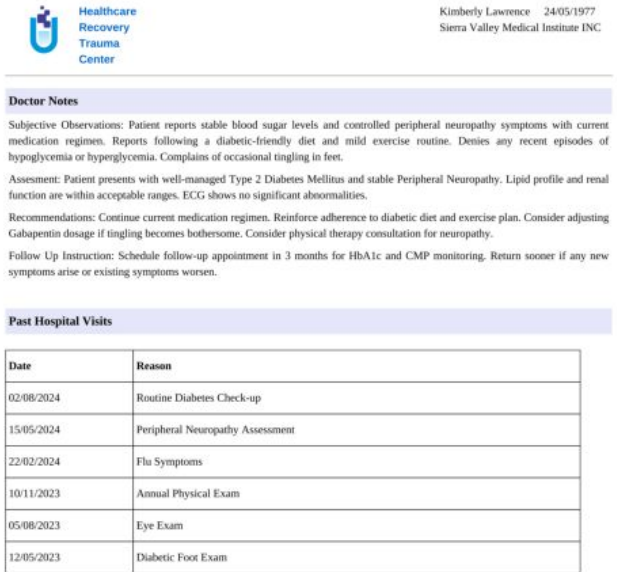

Visual Document Understanding
OCR
Image Preprocessing
Data Ingestion
Table Detection & Recognition
Visual Doc Classification
Visual Doc NER
DocVQA
Text Detection & Recognition
Skew Correction
Image Denoising
Image Enhancement

Doctor Notes

Subjective Observations: Patient reports stable blood sugar levels and controlled peripheral neuropathy symptoms with current medication regimen. Reports following a diabetic-friendly diet and mild exercise routine. Denies any recent episodes of hypoglycemia or hyperglycemia. Complains of occasional tingling in feet.

Assesment: Patient presents with well-managed Type 2 Diabetes Mellitus and stable Peripheral Neuropathy. Lipid profile and renal function are within acceptable ranges. ECG shows no significant abnormalities.

Recommendations: Continue current medication regimen. Reinforce adherence to diabetic diet and exercise plan. Consider adjusting Gabapentin dosage if tingling becomes bothersome. Consider physical therapy consultation for neuropathy.

Follow Up Instruction: Schedule follow-up appointment in 3 months for HbA1c and CMP monitoring. Return sooner if any new symptoms arise or existing symptoms worsen.

Past Hospital Visits

Date	Reason
02/08/2024	Routine Diabetes Check-up
15/05/2024	Peripheral Neuropathy Assessment
22/02/2024	Flu Symptoms
10/11/2023	Annual Physical Exam
05/08/2023	Eye Exam
12/05/2023	Diabetic Foot Exam

5’ Break.

VLMs

- Small VLMs inside Visual NLP library. Tables, Forms, Schema Driven Extraction. Handwriting. Deployed through Visual NLP locally.
- Task Specific VLMs. JSL-Vision. Plain & Structured outputs. Deployed locally.
- Medical LLM Small in Databricks.

Local Small VLMs inside Visual NLP

- These are measured within pipelines.
- Check notebooks in this repo.

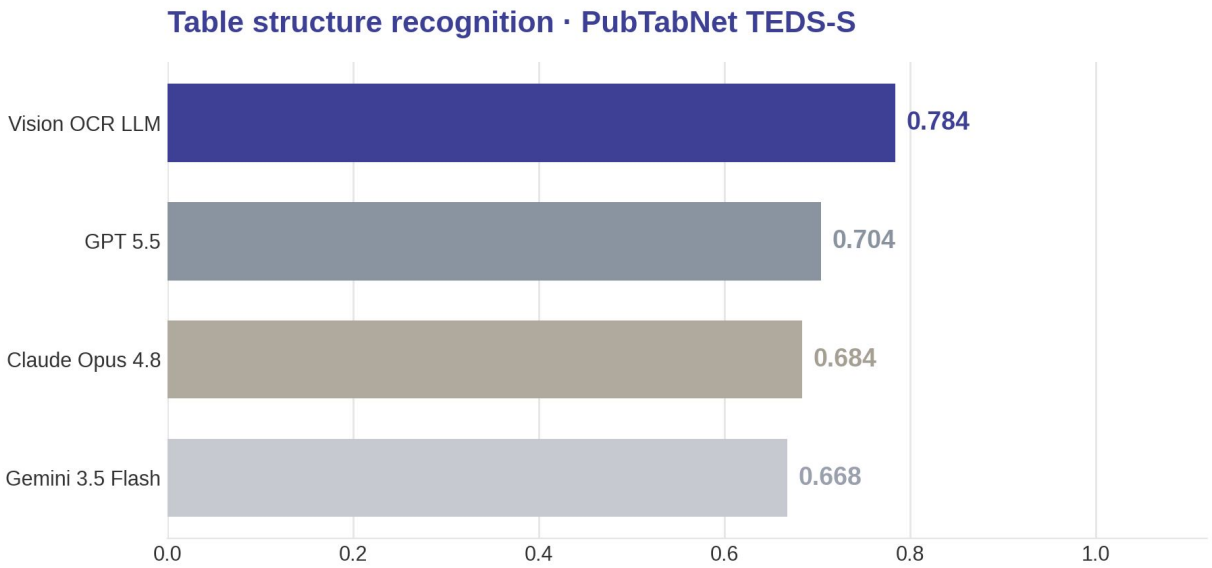

JSL-Vision

- Single Task models, Table Recognition, Bounding Box grounding, Structured Extraction.
- Vision OCR LLM: *Grounding specialist.* Word-level OCR with precise bounding boxes, single-GPU.

  AWS Marketplace
- Vision OCR Structured LLM: *Structure specialist.* Document to schema-constrained JSON.

  AWS Marketplace
- JSL-Vision Docs.
- Local deployment.

Medical-LLM-Small - Databricks

- Designed to bring medical-grade multimodal intelligence into a smaller, more efficient package.
- medical text but + visual information across scans, charts, diagrams, and structured documents.
- It can analyze X-rays, MRIs, pathology slides, medical diagrams
- 32K context window, compact yet powerful.
- Databricks Marketplace Listing: https://marketplace.databricks.com/details/2d3cabaf-e93e-45e0-a954-822202000afd8/John-Snow-Labs_Medical-LLM-Small
